

What caused the 32-cubed rotation-transfer reversal?

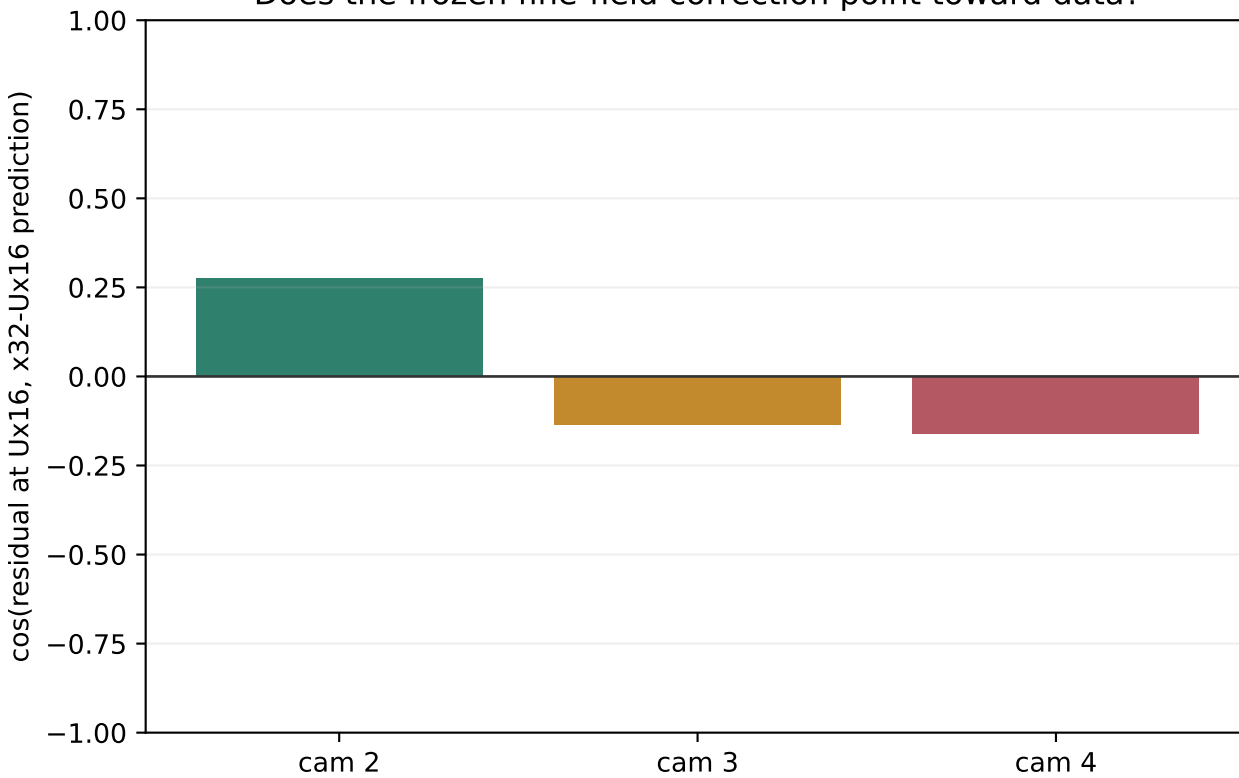

Grid/field decomposition on rotation 40

Diagnostic path; no alpha is selected

Does the frozen fine-field correction point toward data?

POST-OPEN MECHANISM DIAGNOSIS

Decision: OPENED_BLOCK_FORWARD_GRID_CHANGE_MATERIAL_MECHANISM_UNRESOLVED
A16 x16 vs A32 Ux16 gap: 0.013541
A32 x32 harm vs A32 Ux16: +0.102788
pooled correction cosine: -0.052812
diagnostic alpha*: -0.116261

One opened rotation block; same cameras.
No field truth, final rotation, causal proof,
algorithm selection, or paper claim.
