

PSU B0 VDO-A: camera-wise adjoint conflict mechanism probe

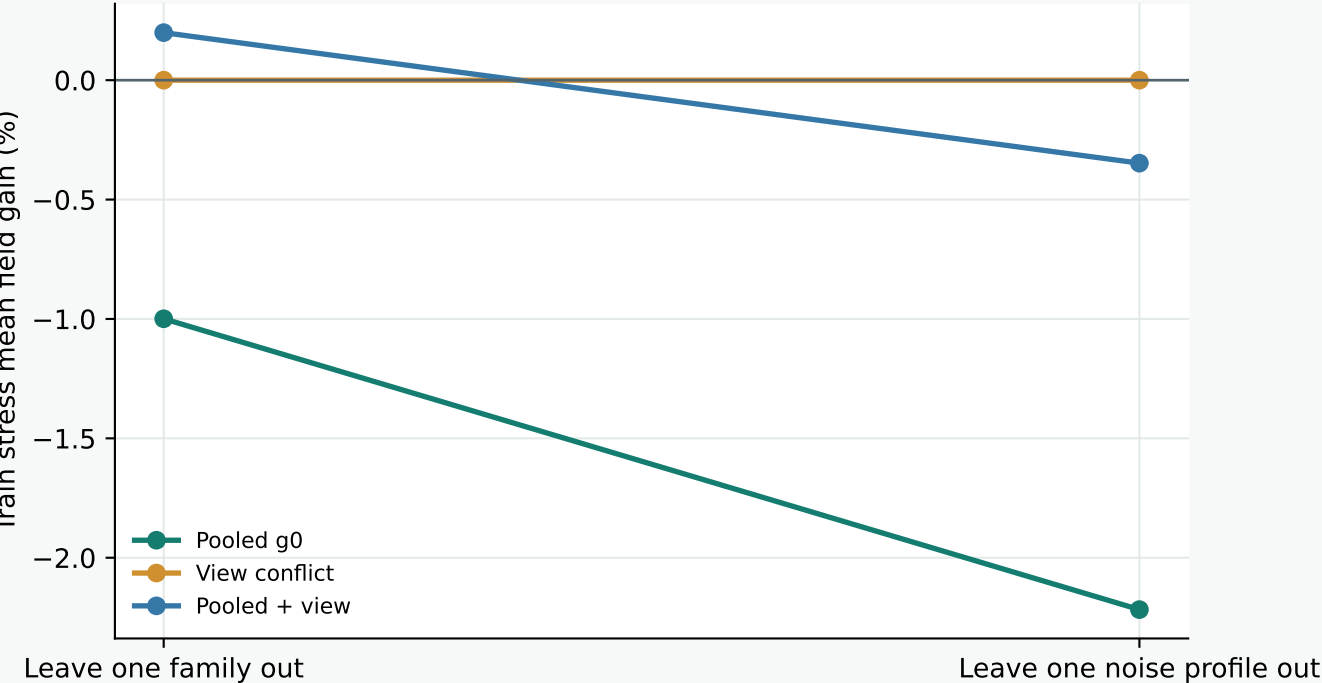

A Adjoint-only view features do not beat pooled transfer

B Combined features lose utility and still harm fronts

C View conflict softens family shift but fails noise shift

D Decision: interface PASS, representation NO-GO

Grouped sum relative error
1.78e-07 PASS

Wall time / peak RSS
5.97 s / 436 MB LOCAL

Combined validation / calibration
2.258% / 1.604% FAIL
